
Closed Loop Cooling Water Modules
for Compressors and Gas Turbines

The Global Leader in Air-Cooled Heat Exchangers Since 1939

The Advantages of Hudson Products Closed Loop Cooling Water Modules

- ~ Integrated supply of heat exchanger and pump skid
- ~ Single source system responsibility
- ~ Optimized heat exchanger and pump skid packages are custom designed by experienced system engineers
- ~ All electrical components are wired to on-skid terminal boxes to minimize site installation time and cost
- ~ Modules are complete with an expansion tank to contain fluid expansion, provide positive pump suction and system make-up water
- ~ Modules are factory assembled to assure pumps and piping are perfectly aligned
- ~ Modules are factory run-tested prior to shipment
- ~ Factory Acceptance Tests (FAT) includes system leak test, air-side performance measurements and vibration and noise analysis
- ~ Modules are factory flushed, sealed and pressurized with dry nitrogen prior to shipment
